

Project title: Create helper functions for the listing model

Project Value: Ksh. 450

Due date: 5th Feb 2020

Instructions

1. On the listing project folder, navigate to app > CustomHelpers > Listing folder
2. Open the ListingHelper.php file.
3. The task is to create functions similar to the updateTitle function. The following functions should be created to update corresponding values in the listing table:

FUNCTION	TABLE FIELD TO UPDATE
updateName()	name
updateType()	type
updateUnits()	units
updateParkingSpaces()	parkingSpaces
updateParkingSpacesPerUnit()	parkingSpacesPerUnit
updateStartDate()	startDate
updateEndDate()	endDate
updateAddress()	address
updatePhysicalAddress()	physicalAddress
updateConstructionDate()	constructionDate
updateRenovationDate()	renovationDate
updatePinLocation()	pinLocation
updateLandMark()	landMark
updateOccupationCertNo()	occupationCertNo
updateOccupationCertImg()	occupationCertImg
updatePlotNo()	plotNo
updateBuildingMaterial()	buildingMaterial
updateFurnished()	furnished
updateModernFinishing()	modernFinishing
updateAdvertisingCost()	advertisingCost
updateDiscount()	discount
updatePayable()	payable

updateReceived()	received
